

The Seven Habits of Effective IT Executives

Seek first to understand

Effective IT leaders base their decisions on data, using intuition when called for but not over-relying on it.

Synergize

Most IT failures can be traced to cross-domain misconfigurations, resulting from siloed IT operations and lack of end-to-end visibility.

Think win-win

Successful IT executives are those that seek win-win solutions that help all parties gain.

5%

24% Be proactive

When your IT teams are constantly busy firefighting, there is no time left for important and game-changing initiatives.

Begin with the end in mind

Most IT executives have clear and measurable goals

Put first things first

When the goals are clear, it's easy to set the priorities for your IT teams.
